

FINANCIAL INFORMATION and Sliding Scale Rates

At Restore and Rebuild, we don't want finances to be an obstacle to people receiving the help they need. We offer a standardized sliding scale of fees for services based on annual gross household income and household size. For Associate Professional Clinical Counselor Sonja Spano Pratt, Associate Professional Clinical Counselor Laurence Towner, and Associate Marriage and Family Therapist Joe Lo, our rates are as follows:

Sliding Scale Rates

Gross Household Income per Year	Cost Per Session
more than \$150,000	\$160
\$110,000 - 150,000	130
\$80,000 - 110,000	110
\$50,000 - 80,000	95
less than \$50,000	75

Please note: *If you are paying for therapy yourself, then the cost per session is based on your own gross household income per year. However, if your parents are paying for your therapy, then the cost per session is based on your parents' gross household income per year.*

My annual gross household income (including income from **all** sources): _____

If you agree to pay the session fee as determined by your income level, please check the box below and sign this form.

☐ I agree to pay the session fee for my income level as determined by the sliding scale

Name of Client (or parent/guardian
if client is a minor)
